PROJECT REPORT

Digital Literacy Project Report

Name: Aakarsha Parashar

Registration Number: 25BAI10492

Branch: B.Tech CSE

Year: 1st Year

Course Code: CSE0001

Course Title: Digital Literacy

Date of Submission: 31st march, 2026

INTRODUCTION

This project focuses on developing essential digital literacy skills required for students in today's technology-driven world. As a Student Digital Ambassador, the objective was to understand and apply concepts such as online presence, digital communication, cybersecurity awareness, and the use of digital tools.

Through this project, I explored various platforms, created professional profiles, designed an infographic, and learned about safe online practices. This project helped me understand the importance of responsible and effective use of digital technologies in academic and professional life.

TASK 1

For this task, I created a digital literacy infographic using Canva. The infographic explains key concepts such as the meaning of digital literacy, useful digital tools, safe internet practices, and email etiquette.I designed the infographic using simple layouts, icons, and colors to make it visually appealing and easy to understand. The aim was to help students quickly grasp important digital skills. One challenge I faced was organizing all the information clearly without making the design too crowded. However, I found it interesting to experiment with different layouts and visuals to make the content engaging.

Digital Literacy

What is Digital Literacy?

The ability to use technology effectively and critically evaluate information online

Useful Digital Tools for Students

- Google Docs
- Zoom
- Online Research
- Note-Taking Apps

Safe Internet Practices

- Use Strong Passwords
- Avoid Suspicious Links
- Think Before You Share

Professional Online Presence

- Create a Linkedin Profile
- Use Respectful Communication
- Keep Your Profiles Updated

Stay Smart Online!

TASK 2

In this task, I created profiles on GitHub, LinkedIn, and Stack Overflow to build my digital portfolio. GitHub is used to store and showcase projects and coding work, while LinkedIn helps in professional networking and connecting with recruiters. Stack Overflow is useful for asking and answering programming-related questions. Over the next four years, I plan to regularly update my GitHub profile with projects and assignments to build a strong portfolio. I will use LinkedIn to explore internship opportunities and connect with professionals in my field. Stack Overflow will help me improve my problem-solving skills by interacting with the developer community.

This task helped me understand the importance of maintaining a professional online presence.

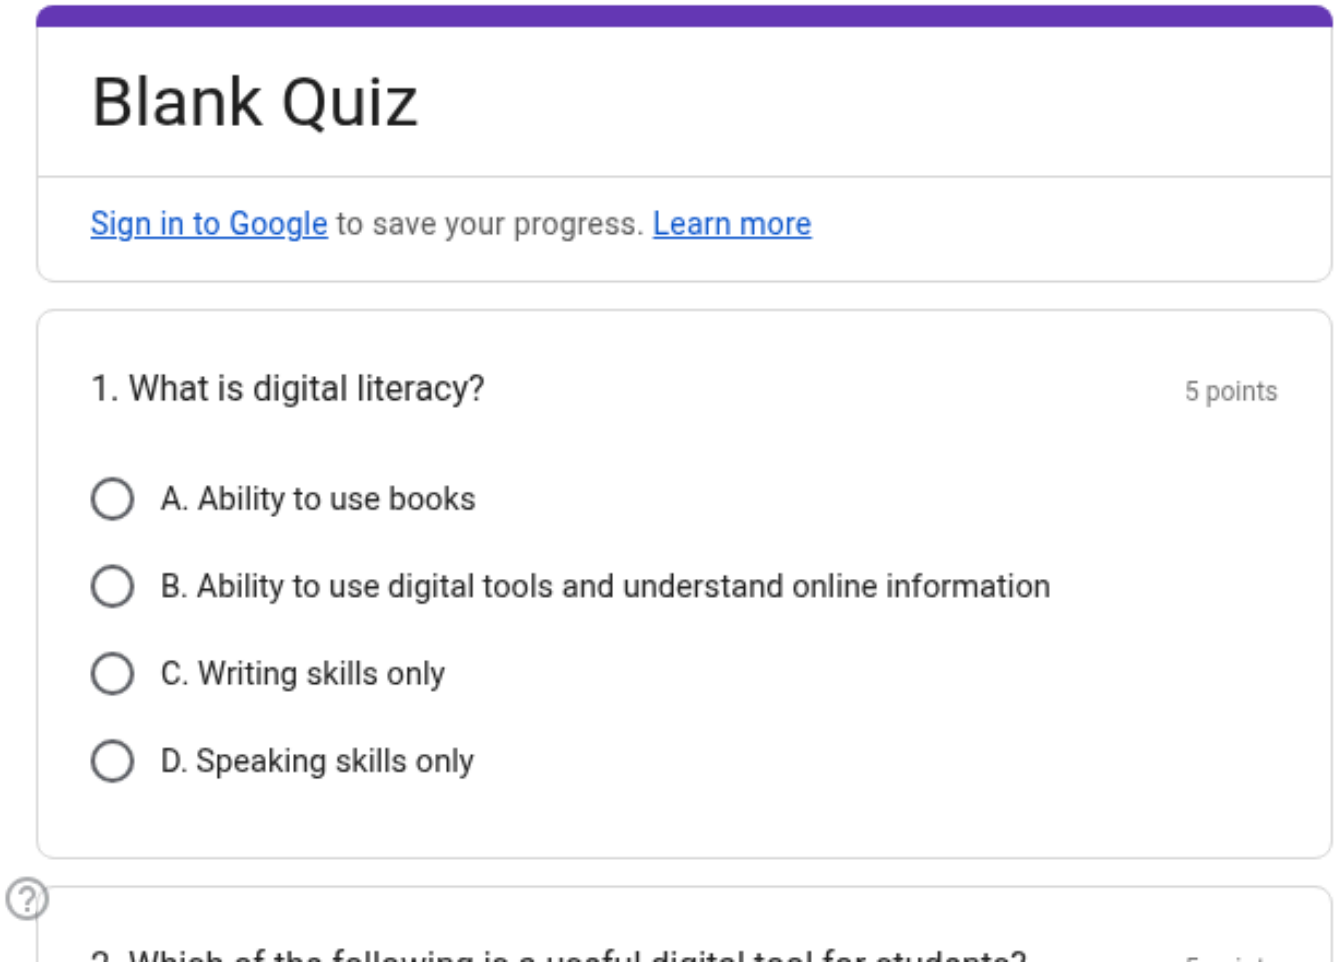
TASK 3

In this task, I used Hackerank to practice coding and completed a beginner-level problem. This helped me understand basic programming concepts and problem-solving techniques. I also created a Google Form to design a digital literacy awareness quiz. The form included multiple-choice and short answer questions related to digital safety and tools. I linked the form to Google Sheets to collect responses. This task improved my understanding of coding platforms and collaboration tools. These tools will help me academically by enhancing my coding skills and enabling me to create surveys and collect data efficiently.



TASK 4

Poor digital communication can lead to misunderstandings and missed opportunities. For example, sending an email without a clear subject line or proper tone may result in the message being ignored or misunderstood.

In academic and professional environments, this can cause serious issues such as missed deadlines or lack of response. To avoid such problems, it is important to follow proper email etiquette, including using a clear subject, polite language, and structured content.

This task helped me understand the importance of professional communication.

Email 1: Assignment Extension Request

Subject: Request for Assignment Deadline Extension

Dear Professor,

I hope you are doing well. I am writing to request an extension for the assignment submission due to unforeseen circumstances.

I will ensure that I complete the assignment as soon as possible. I kindly request you to grant me a short extension.

Thank you for your understanding.

Sincerely,

Aakarsha

Email 2: Internship Application

Subject: Application for Summer Internship Opportunity

Dear Sir/Madam,

I am a first-year B.Tech CSE student and I am writing to express my interest in a summer internship at your organization.

I am eager to learn and gain practical experience in the field. I would be grateful for an opportunity to contribute and learn from your team.

Thank you for your time and consideration.

Sincerely,

Aakarsha

social media checklist

(task-4 continuation)

DO's:

- Use strong passwords
- Think before posting
- Keep profile professional
- Verify information
- Respect others

DON'Ts:

- Share personal data
- Post offensive content
- Click unknown links
- Share OTP/password
- Spread fake news

TASK 5

While researching cybercrime, I was surprised by how common phishing attacks are and how easily people fall victim to them. Many fraudulent messages and websites look very real, making them difficult to identify.

This task helped me understand the importance of being cautious while using the internet. One habit I will change is carefully checking links and verifying sources before sharing any personal information.

Overall, this task increased my awareness about online safety and protecting personal data.

CASE STUDY

Phishing is a type of cybercrime where attackers trick users into revealing sensitive information such as passwords, OTPs, or bank details. It usually occurs through fake emails, messages, or websites that appear to be from trusted sources.

For example, a college student may receive an email claiming to be from their bank, asking them to verify their account due to suspicious activity. The email contains a link that looks legitimate but actually leads to a fake website. When the student enters their login details, the attacker captures this information and gains access to their account.

Phishing attacks often target students and young users because they may not always verify links or email sources. These attacks can result in financial loss, identity theft, and misuse of personal information.

Such incidents highlight the importance of being cautious while clicking links and sharing personal details online. Users should always verify the authenticity of emails and websites before taking any action.

Prevention checklist

(task-5 continuation)

Stay Safe Online Checklist:

- Use strong and unique passwords for all accounts
- Never share OTP, PIN, or passwords with anyone
- Always check the URL of websites before entering details
- Avoid clicking on suspicious links or unknown emails
- Enable two-factor authentication (2FA)
- Use secure and trusted Wi-Fi networks only
- Regularly update your apps and devices
- Verify messages claiming to be from banks or officials

UPI Safety Tips:

- Do not approve unknown payment requests
- Never share UPI PIN with anyone

Report Cybercrime:

- National Cyber Crime Portal: https://cybercrime.gov.in
- Helpline Number: 1930

CONCLUSION

This project helped me develop a better understanding of digital literacy and its importance in today's world. I learned how to create a professional online presence, communicate effectively, and stay safe online.

The tasks were practical and helped me gain hands-on experience with various digital tools and platforms. Overall, this project has improved my confidence in using digital technologies responsibly.
